## *Web Design/Development for Kindred Spirit*

This is a freelance project teamed with another web freelancer for a film production company. For the first iteration, the major design and interaction mechanism for the web is “projection light”. The second iteration, on the other hand focuses on the style and textures from the company logo and core image.

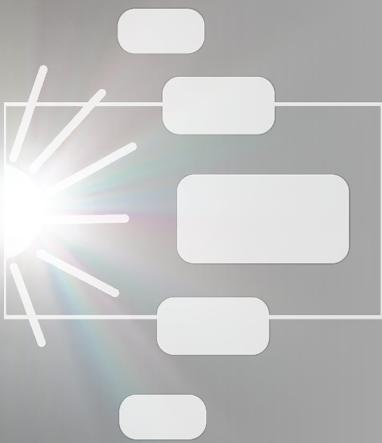

Web design and development on Squarespace, with customized HTML / CSS / Javascript, as well as wireframes and graphics designed with Adobe XD, Adobe Illustrator, and Blender.

# Works

*Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed diam nonummy nibh euismod tincidunt ut laoreet dolore magna aliquam erat volutpat. Ut wisi enim ad minim veniam, quis nostrud exerci tation*

**The main interaction:** while scrolling, the light beams on the left will rotate, imitating a moving projector light. The text and image sections are formatted like a reel where the center section appears large and focused and those scrolled away appear smaller / further.

**Page Transition:** after clicking a link, the website will turn dark and then quickly light up after the next page is loaded, imitating a light turning off and on. Such motion effect can be achieved with blur filter, light beam / halo image assets, and brightness filter.

This is marketing design project I have been doing for Global Talent Link(GTL), where I created a whole new set of visual assets for different medium inlcuding video, illustrations, website, and print. This new set of graphics is created to convey warmth and a sense of community.

Woring both independently and collaboratively with service and development teams , I created new prototypes and assets for website pages, made motion effects and Lottie animation for marketing video, as well as flyers for print and brand image (re)desiging with new style, core images and assets.

### Confucius Said

A wise person possesses a clear mind

Even today, we see these principles displayed in stories such as The Wizard of Oz. For instance, Dorothy traveled to the magical land of Oz where she met her three companions. The Scarecrow wanted a brain. The Tin Man wanted a heart. The Lion wanted courage.

Every service GTL offers incorporates **iABC** so that each individual can grow to become a better thinker, learner, and change maker in our world. Our community is a growth-oriented, learning village where anyone in the world can nurture their potential through collaborations with peers, near-peers, and professionals.

**Air, Water, Fire** is a series of self-directed multimedia projects containing graphic design, web interaction design, prints, motion effects, VR video, videography, and game. It demonstrates and tells stories of 3 imaginary tools that are able to manipulate data with elemental energy.

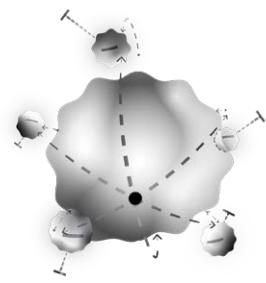

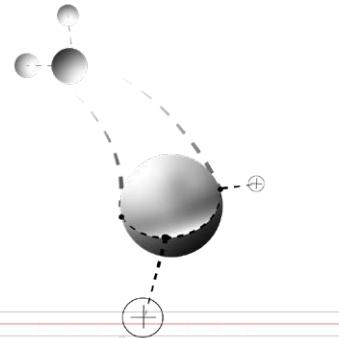

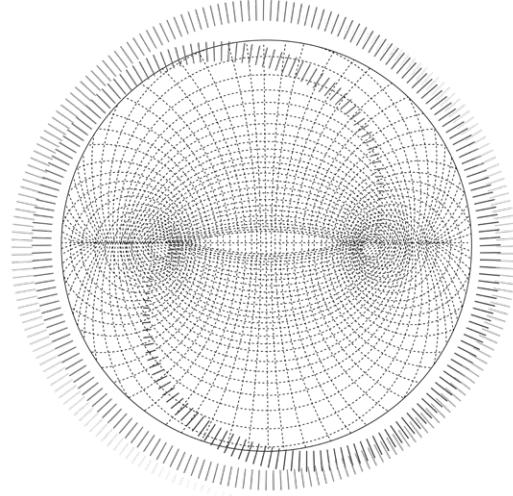

**Water**'s main UI is designed on an interactive cube where each face shows a page of conversational text, videos, photos and illustrations. Another important part of the work is logo and info-graphics design for print.

***Share Screen*** is an online exhibition. I was commissioned to design the homepage of this exhibition website in Oct, 2020.

The homepage is designed for both desktops and phones. On desktops the main menu is presents as a stack of papers which upon mouse click will unfold into a wheel of options. On the phone, the menu expands and folds as a dropdown. The background is a 3D rendered image with WebGL filter and its perspective moves with mouse motion.
